

When a design has unity the elements are organized so that the viewer feels like they belong together.

UNITY

Unity can be achieved with the help of a grid system. (1. & 2.)

TERRY FOX RUN

On September 28th, there was excitement in the air and not just because of the shortened morning blocks. It was the day of the 26th annual Terry Fox Run, and everyone was holding their breath until lunch and the run.

As soon as the bell rang, the entire school flooded out onto the grass field, with many students dressed in a very Argylian green and gold. Everyone lined up at the far end, talking so excitedly that even Mr. Therrien had trouble getting everyone to calm down. Eventually, it was quiet enough for Victoria Fawkes to do the countdown for the run. At her signal, the runners burst forward, disappearing from view in less than a minute, while everyone else shuffled along far behind. Most students were happy with the bright sun, but I'm sure most of the runners could have used a little cloud cover!

After the run, donations were taken, bookmarks were given out, and people rushed to gulp water from their own bottle if they were lucky, or the school water fountains if they weren't. Still, a good Terry Fox Run was had by all.

BOYS SOCCER JUNIOR

BOYS SOCCER SENIOR

The senior boys' soccer team was made up of an impressive collection of talented soccer players this year. Led by Mr. Clark...

Using similar colours, type or shapes etc. is another way of uniging your design. (1., 2. & 3.)
