Final PowerPoint Presentation

This presentation will showcase all that you have learned in this class thus far. You will include all finished projects that you have handed in so far in the form of a PowerPoint presentation. You may, if you wish, use Mac Keynote, or NeoOffice if you wish to not use MS PowerPoint.

Here are the criteria for your final project:
- Your presentation will include 6-8 slides. Click here to get started.
- You must have a hyperlink to a website, and one to another slide in your presentation. Click here for a tutorial.
- You will incorporate your stop motion animation into your presentation. On the same page, you must include bullets that explain what you have learned in regards to i-movie, and filmmaking in general (5-7 points) Click here for a tutorial.
- Incorporate the collage you created as the background in one of your slides, this can be done by inserting it as a picture, or a background. Overtop of this collage, you will use bullets to explain what you learned about Photoshop and digital imaging. Click here to learn how to format a background.
- You must have a title page!!!! Be creative with this, the background is something that you will have designed.
- A slide with your likes and dislikes of the course. The background will be a photo that you have taken.

  Notes:
- Important! In order for your Movie to be able to play in your presentation, you must first create a folder. Title it "BiffTurkleFinal", (or whatever your name is)
- Inside this folder you will save your PowerPoint/Keynote/OpenOffice file
- You will also save a file of your QuickTime movie **This is the file that you will link to in your Presentation. You may have to go back into Powerpoint, or whatever program you are using to create your presentation.**
- Make sure that your presentation runs smoothly before handing it in, try it on another machine
- Use spell-check

This final presentation will be out of 100 marks. Save it on your Flash drive, or to your 4shared.com account and upload it to my teacher dropboxes.
