LINE

To be able to talk about
art, you need to learn
the language!

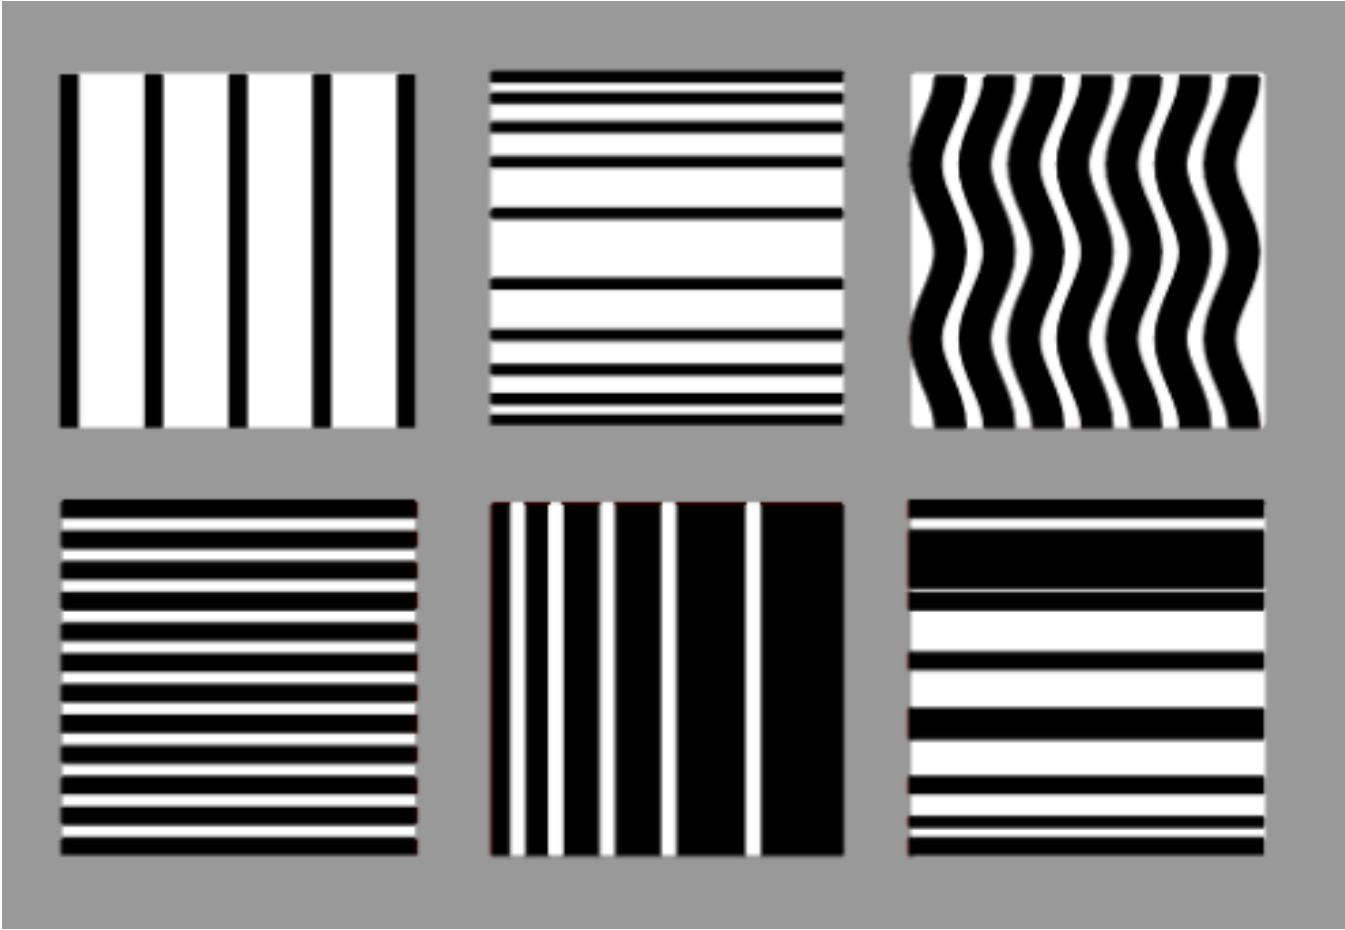

- Fortunately there aren't too many words to remember

1.Line

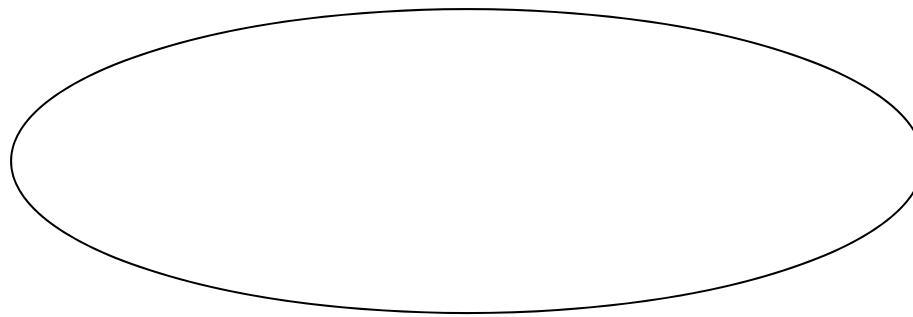

What is a line, anyway?

Technically, it is thin continuous mark, as that made by a pen, pencil, or brush applied to a surface.

Might be straight...

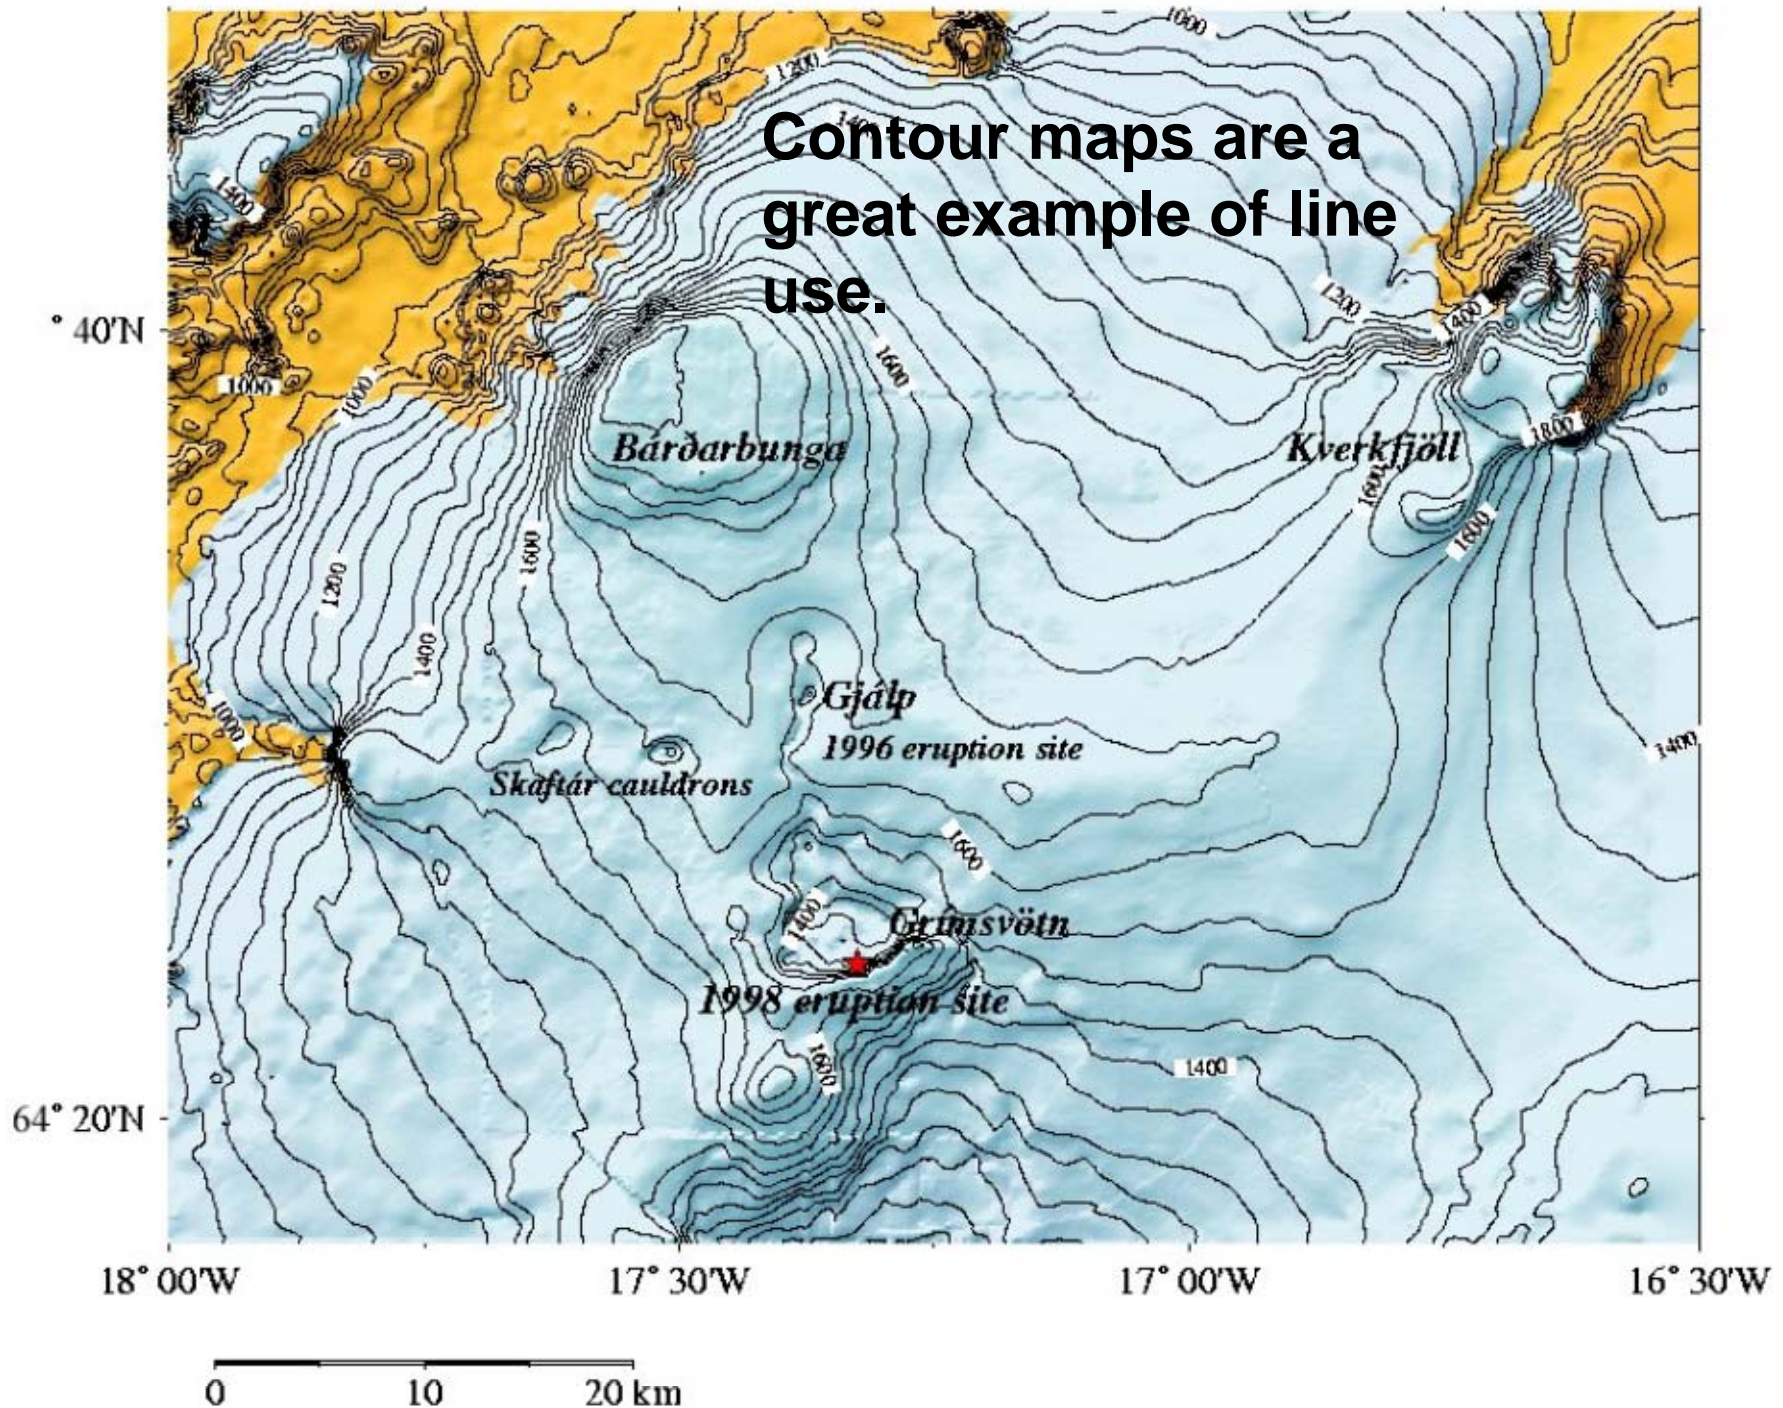

It might be curvy

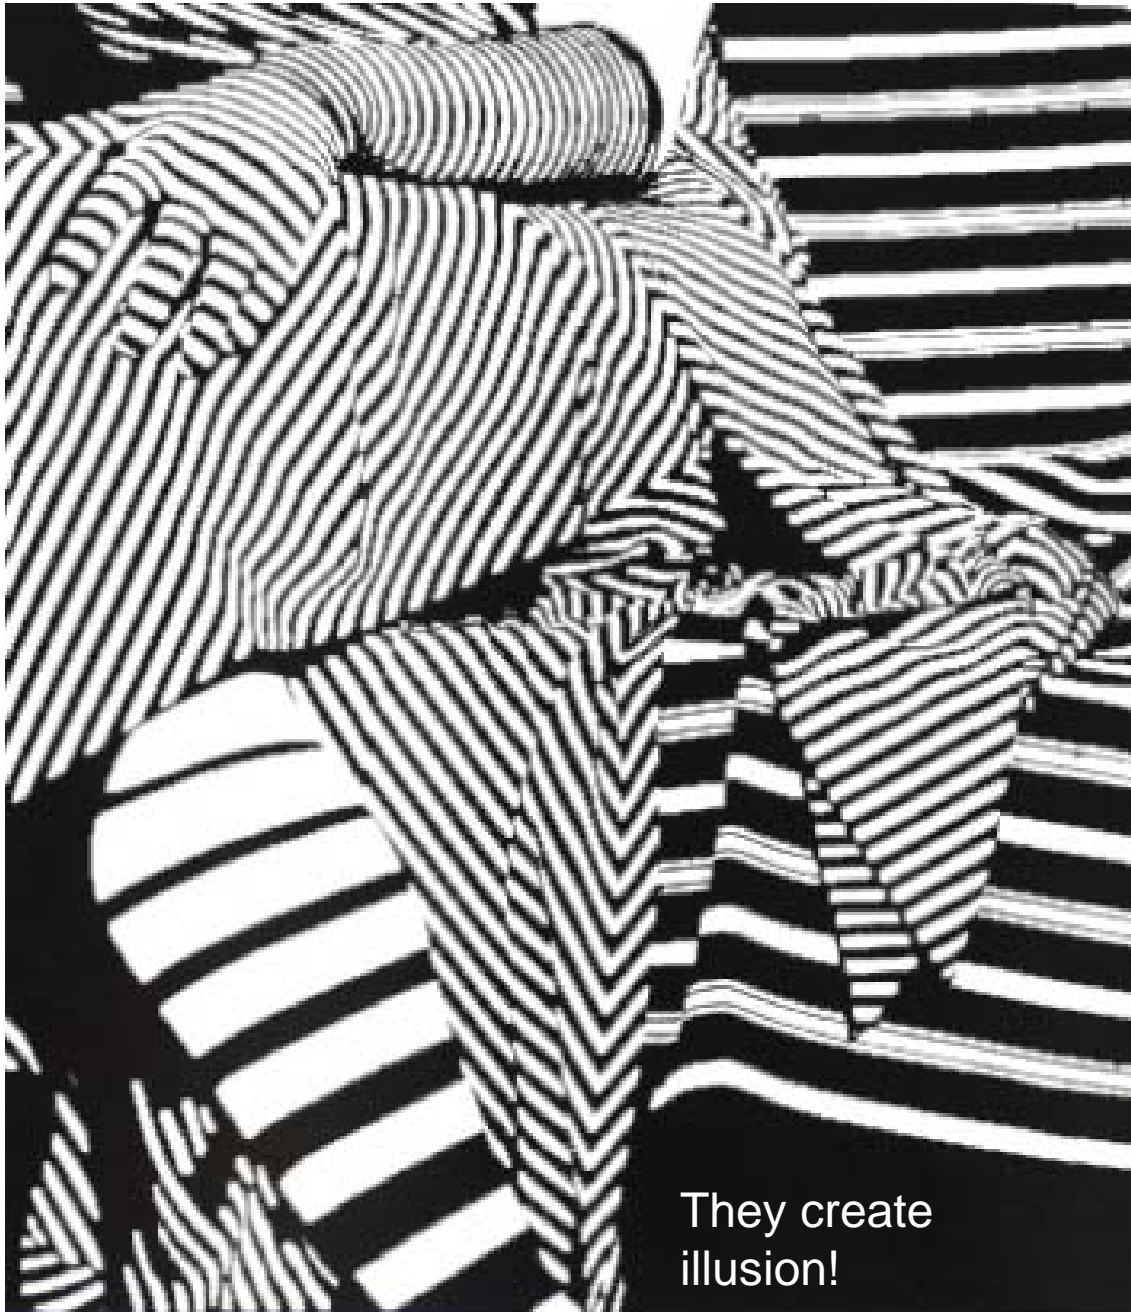

In reality, lines "create" recognizable forms, like cartoon characters, cars, anything!

Contour maps are a great example of line use.

So what does a line do?

They create illusion!

They create depth!

Lines create texture and feeling

Movement!

So what am I going to do with
lines?
