Acting the Part

For this project, you will be engaging the viewer to question what exactly is going on in your photograph.
Tell a story about something, but leave certain details up to the viewer.
The real key here will be to set up as elaborate a shot as possible.
You will of course be able to "finesse" this project in Photoshop.
I would like you to create a new Blank File, size A3, as your canvas, or crop your photo to 11" x16.5" using the crop command.
You will be handing in a .jpg into the correct teacher drop box.
