

Show me you understand the following 18 points. That doesn't mean telling me a dictionary definition.

You can use new or existing photos if you incorporate photos for some definitions. (New is always better.) You may choose to do a lot of writing, or you may not.

Submit as a video, .pdf, slideshow...

1. Visual elements
2. Compositional techniques
3. The effect of shutter speed (what can it do)
4. The effect of different apertures (what is this called)
5. What is iso?
6. White balance
7. Teach me how to develop a print (walk me through the steps. You may or may not incorporate photos into this)
8. Show me how to select an object from a photo and cut and paste it onto another
9. Show me you understand pixel dimensions, and proper resolution for printing, etc.
10. Explain layer masks to me
11. What is the difference between .raw and .jpg images?
12. Is photography a tool or an art form to you? Explain. There is no wrong answer.
13. Why is photography still relevant in an age of moving pictures?
14. Why take a photography class when anyone with an iphone 6 can take an amazing photo?
15. What is proper exposure?
16. What did you love about this course, what did you love less?
17. In the darkroom more light equals a _____ print. Explain how this works.
18. Explain how negatives and photo paper works.

If you were not here for a project or concept, ask someone to explain it, then ask me.
